MEZO MUSD BUILDATHON · TRACK 2 · WAVE 1

Trove Guardian

Never get liquidated by surprise.

Telegram alerts and a live dashboard for Mezo MUSD loans

trove-guardian.onrender.com

Borrowers can’t watch the price all day

1. Borrow

Lock BTC as collateral and borrow MUSD against it.

2. Price falls

If BTC drops far enough, the loan can be liquidated.

3. No one is watching

Most people can’t keep a dashboard open 24/7.

A guardian that watches for you

Alerts

Warns you at levels you choose, before liquidation.

What if?

Shows what happens if BTC falls by any percentage.

Fix it

Tells you how much to add or repay to be safe again.

How it works

Mezo contracts
Reads your Trove and the BTC price

→

Node.js bot
ethers.js checks every minute

→

Upstash Redis
Remembers who is watched

→

Telegram
Alerts, plus a web dashboard

It works on a real Mezo testnet loan

2,202
MUSD debt

0.048
BTC collateral

177%
collateral ratio

38%
BTC drop before liquidation

Live, always on, and the watch list survives restarts.

Real Trove on Mezo testnet

What comes next

Mainnet

Support Mezo mainnet Troves.

Summary

Daily summary and alert history.

One tap

Jump straight to adding collateral in the Mezo app.
