TROVE GUARDIAN

Never get liquidated by surprise.

Telegram alerts, a live dashboard and a one-tap rescue for Mezo MUSD loans.

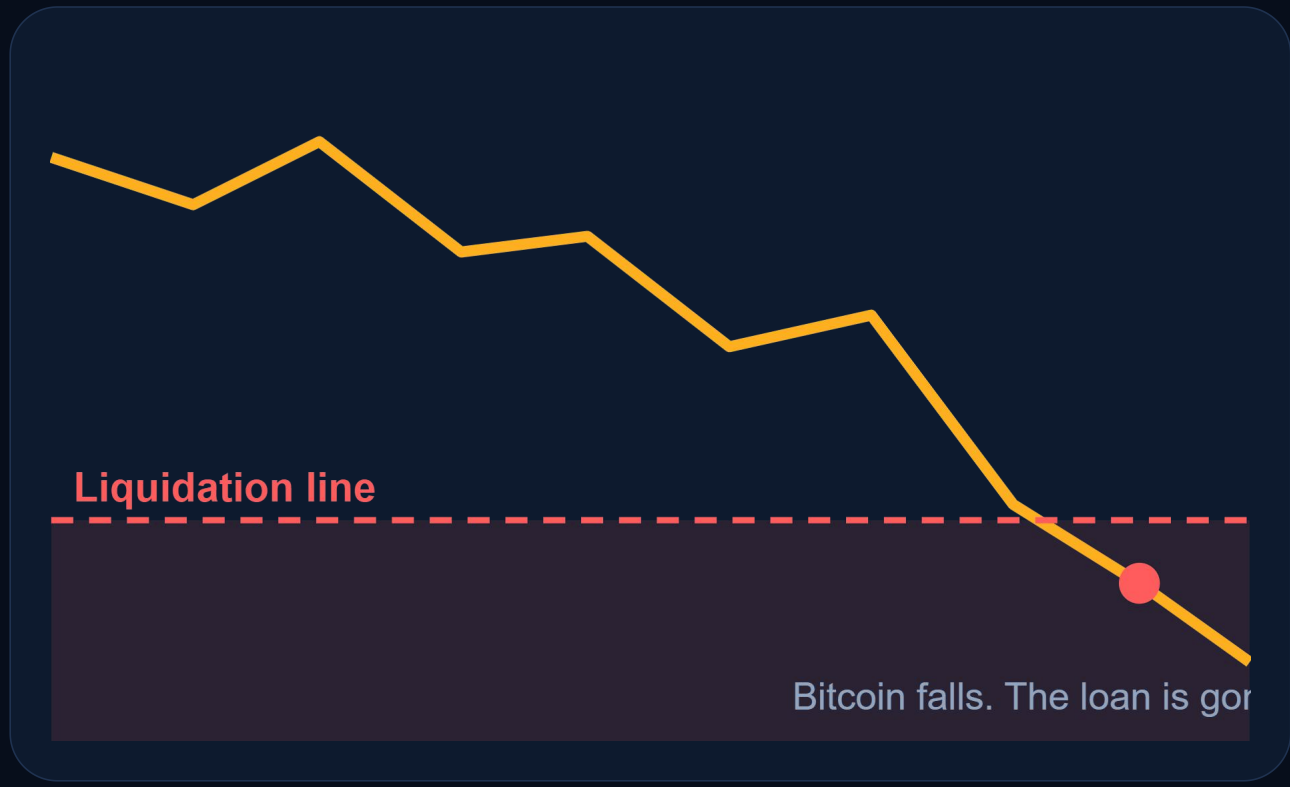

Track 2 | Mezo testnet + mainnet read-only | Live and tested

trove-guardian.onrender.com

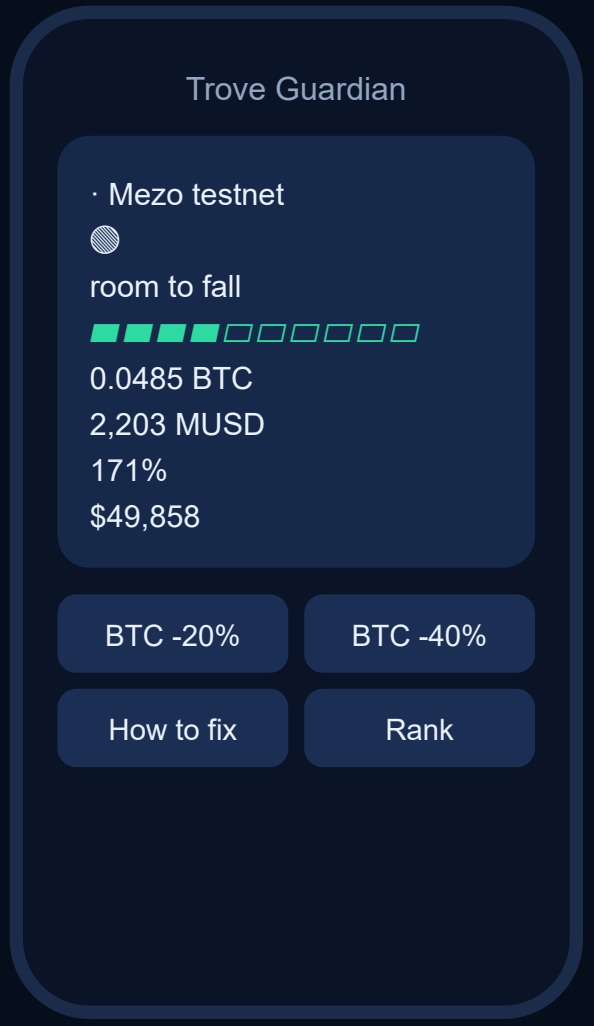

A price drop can take your loan. Nobody watches 24/7.

Borrow MUSD against Bitcoin on Mezo, and if BTC falls far enough the loan is liquidated. Most borrowers cannot keep a dashboard open all day.

Borrow | Price falls | Liquidated

Trove Guardian · Mezo MUSD Buildathon · Wave 2

Two ways in: Telegram and the web

Mezo testnet

37.4%

Bitcoin can fall 37.4% before this loan is liquidated.

Now $79,635 — Liquidated at $49,858

One tap to rescue a risky loan

1. Alert

The bot warns you in Telegram, with buttons to simulate and fix.

2. Simulate

The dashboard checks the call before anything is sent.

3. Sign

Your wallet adds collateral or repays. We never hold keys.

Tested on a real loan

Add 0.0005 BTC: tx 0x3f00...6858

Repay 5 MUSD: tx 0xe640...09ad

168% to 170%

Both transactions are linked in docs/EVIDENCE.md

Reading Mezo mainnet, read-only

Live data on Nov 4: only 3 open Troves. The redemption queue view uses Mezo's own sorted list.

116%
lowest ratio, close to the 110% line

134%
second lowest

8,900%
highest, very safe

0 transactions sent on mainnet

/riskiest

/rank

A small market today, built for when borrowing grows

From Wave 1 feedback to Wave 2

The judge said		What changed
Read-only, never acts	→	Adds collateral and repays through BorrowerOperations, simulated first
Alert gaps	→	Price-read failure and closed or liquidated notices; buffer from getCurrentICR
Respect the minimum debt	→	Read from the chain, and repayments below it are refused
Link the bot, sample, deck	→	Done, plus a redesigned dashboard and Telegram buttons
A missing deck caps Materials	→	Deck, README, evidence page and a new video
A revenue idea	→	Free tier now, premium alerts planned

Ready to operate on its own

Always on
Checked every 5 minutes, hosted on Render

Remembers
Redis keeps every watch across restarts

Tested
16 automated tests on every commit

Safe by design
No keys held, read-only mainnet and relay

Documented
README, architecture and evidence

Honest limits
Testnet rescue, few mainnet Troves, no Passport

Runs on free tiers today. About $7 a month for always-on hosting when usage grows.

An honest market and a clear plan

Market today

Only 3 open Troves on mainnet. Trove Guardian is built for when borrowing grows, and its redemption view applies to every Trove.

Reaching users

Telegram first, then the Mezo ecosystem and community posts. Free for one wallet; premium alerts planned.

Roadmap

By end of December

Mezo Passport for Bitcoin wallets, daily summary and alert history

By end of January

Premium alerts if there is demand, and a capped mainnet rescue evaluated
